

THE FISH ON

JANUARY-FEBRUARY 2023 RACINE WISCONSIN

**"We Safely promote and Sustain the tradition of sport fishing through education,
conservation, stocking and fishing contests"**

Good afternoon, anglers!

I'd like to welcome you into the 2023 season of Salmon Unlimited – Wisconsin. The coming year has welcomed new additions to the board, an expanded roster of members, and ever increasing opportunities to get involved.

First and foremost, I'd like to introduce myself to our entire membership. I grew up in Waukegan working the walls at Governor's Pier and the south breakwater, as well as numerous inland sites for my fishing addiction. Finishing college at UW-Parkside, I fell in love with Racine's beautiful lakefront and vibrant downtown. We (Suzanne, wife, 'Captain' Lily & Lukas, kids) now call Caledonia home and live only a couple of minutes from our slip in Reefpoint. I am VP of Business Banking for Town Bank and have been working with business owners in SE Wisconsin for over 15 years. I'm more confident than ever that this is the place I want my family to live and serve.

Joining this club's membership was the next step for Lily and I to get involved in the fantastic world of Lake Michigan sportfishing, as well as continue our record of public service via non-profit organizations. We immediately struck up new friendships with members, its board, and other volunteers during the meetings and events.

In my new post, I intend to steer this club under the philosophy of doing what is in the best interest of the club, and its membership. This will include continuing to promote & project the values instilled within this club's bylaws, encourage volunteerism from all membership, recruiting new talent in order to improve skill sets, redundancy in roles, and efficiency of our operations.

With your help, I hope to bring more enthusiasm and excitement to our monthly meetings, expand on the success of our two key fishing events (Salmon-A-Rama and Jackpot Series), as well as our image & commitment to serving our community through all of our other programs.

I will be reaching out to the membership at large from time to time asking for knowledge/expertise, volunteerism, and support. To carry this club forward, it will take more than a few burned out board & committee members like we've had in the past and more open discussion and camaraderie. I'm confident that we will rise to the occasion when called upon and would be thrilled to hear from anyone willing to participate, in advance.

Regarding our two fishing events, Salmon-A-Rama (July 15th - July 23rd) operations have come roaring back to life with an expanded budget and fresh committee members to bring in additional sponsorship. Keep watching the website and Facebook page for more news. The Jackpot Series has been committed to by the board for 2023, with one key adjustment. The four dates for this year will be May 13th, June 10th, August 19th, & September 9th (shifting the July 8th date into September to move away from the Salmon-A-Rama). For both, sponsorships and volunteers are greatly appreciated!

Meet Our New Treasurer

Jason Baker

Owner of two manufacturing businesses in Racine, Jason has lifelong affection with fishing thanks to his father, Terry, getting the family involved at a young age. The two of them now co-own and slip their boat, Joint Effort, in Reefpoint on the E-2 dock. Aside from handling his two companies, Jason is also a software engineer with 20+ years of experience. His financial and technological backgrounds will be a great boost to SU - WI and the timing of his and his father's new membership is greatly appreciated.

REASONS TO JOIN SALMON UNLIMITED OF WISCONSIN

Why become a Salmon Unlimited Member and what does Salmon Unlimited do for the Community?

<http://www.salmonunlimitedwisconsin.com/become-a-member>

SU is not just another fishing club. Salmon Unlimited is involved in the Racine Community and continue to give back to the people.

***Becoming a SU Member gives you access to the club and it's multiple opportunities to give back and help improve our local community and fishery. It's Camaraderie amongst the members, networking and the sharing of information.

We as an Organization are always looking for new ideas to improve where we can.

***Coming this Spring will be the deployment of the Data Buoy. This is much more of a tool, than just for fishing. It will give you water data up to 7 miles offshore. It will show current, wave height, water temperature and wind direction. This can and will benefit anyone traveling on the Lake.

***One big thing that wouldn't have happened if the club didn't exist, is the stocking of fish. With the addition of the Weir and the Net Pen Project, which are manned by club members. This allows SU of Wisconsin's partnership with the WDNR to continue to stock Salmon and Trout annually. This allows both shore and boat fisherman to continually enjoy great returns of fish every year to the port of Racine. We are trying to teach our youth to preserve what we have so they can pass it along for future generations.

-Life Rings placed on South Pier, Kid's Don't Float Kiosk with loaner life jackets placed at the Public Boat Ramp

-Annual Urban Kid's Fishing Clinic

-Annual Veteran's Fishing Outing

-Annual Root River Clean Up

-Currently working on Wheelchair lifts to be placed at Reefpoint Marina

-The Pavilion at the Public Boat Ramp has been a Venue for Tournaments and Events for many years.

-Salmon Unlimited was the major Volunteer organization for Salmon a Rama, that provided volunteers for the Concessions and Weigh In of the Contest.

-The New SU Jack Pot Challenge Series has been added to the 2023 lineup.

-Over the past 40 years we as a Organization have donated to Educational Scholarships.

These are just a few reasons to become a member of Salmon Unlimited. Meet & create lifelong friendships, knowledge of fishing for Salmon and Trout. The ability to help Your Community with numerous options to give back! So what are You waiting for? Let's continue to grow together!

If you have any questions please contact Josh Sopczak @ josh@suwis.org or any Officer or any of Board of Directors.

It's that time a Year again . Please make checks payable to: Salmon Unlimited WI

Membership dues can be mailed to:

Wisconsin Federation of Great Lakes Sport Fishing Clubs

Meeting Minutes

The Sheboygan Outboard Club

732 North Water Street Sheboygan WI

October 29, 2022

Called to order by President Robert Wincek @ 8:36 am

Meeting was called to order after the Quorum was met.

In Attendance:

Robert Wincek

Lynn Davis- KSFCA

Walter -KSFCA

Mary Lee Both-Hetland- Salmon Unlimited of WI

Chuck Bronte – US Game & Wildlife

Brad Eggold – WDNR

Titus Seilheimer -UWM

Ryan Propsom-WDNR Conservation Officer

Rich Jones

Mark Hasenberg

Introductions by Attendees

Agenda:

Guest Speakers

Commercial Fishing

Conservation Congress Hearing

Chuck Bronte from the US Game & Wildlife Service- Chuck gave a detailed list of people and departments involved in their work. Research on the natural Reproduction of Chinook and Steelhead. They are currently in the process of purchasing their 5th Trailer. Michigan is the process of purchasing their own auto-tagging trailer. Notated that they will need all this equipment as the plan to tag Steelhead, Chinook and Coho. 9.5 million fish auto tagged and once Cohos are adding that number will jump another 3 million Fish tagged yearly. Collection is done from April to mid-September. They look at every piece of data in front of them. Ear bones, Scales, Contaminants, info on the coded wire tag and notation of adipose clip. In Michigan waters from the 2018 Sport Catch 64% of age 2 fish caught were from wild reproduction. Wilder or naturally reproducing fish are caught in open waters. It has been notated that survival of stocked Chinook into lake Michigan comes from the ones stocked on the Wisconsin side of the lake. He also notated Lake Trout caught and % of natural reproduction but I did not catch that number.

Continued on page 13

Brad Eggold-WDNR- Brad gave the link address for the August 30, 2022, Salmon and Trout Informational meeting that was held. Discussed were both long- and short-term goals and what information was used to develop the criteria for each category. He presented slides with Alewife Biomass, Alewife Abundance, Alewife Age Structure, Predator Prey ratios for Chinook. He presented slides with the average weight of age 3 female Chinooks from the fall weir and harbor surveys from all states. Most interesting was the slide on Comments on stocking numbers by species. They only received 14 emails about the stocking of fish. And my personal thoughts were that it was shore fisherman who responded more than open water fisherman (made by seeing the number of asks for increases). For increases Steelhead, Brown Trout and Brook trout had the most request to increase stocking. The largest ask to not change the current stocking plan was for Chinook and had 1 vote to decrease stocking. The only other notable was the ask to increase, one angler asked to increase lake trout stocking and 1 asked to decrease stocking of lake Trout. Brad gave an update on the completed, in process items and items not started initiatives program for 2019. Reviewed current and newly added Initiatives. Reviewed the 2020 – 2022 Stocking Plan.

Brad also reviewed net pens and electronic reporting. Funding for covid related losses (Charters). He spoke briefly about the Pink and Pinook Salmon showing up in Lake Michigan. Cost of stocking fish. Notably that Seaforellen and less expensive to stock than German Browns are.

Titus Seilheimer- UWM - Reviewed Data Buoys locations. Invasive weeds, along with River restoration projects, Yellow Perch increases and Wild Rice Restoration projects.

Ryan Propsom – WDNR Conservation Warden – Ryan spoke about that there will be a stricter enforcement on all Charter and Guides as well as Commercial Fisherman to report their catch asap. Tickets will be given.

Discussion on a Group Resolution to Conservation Congress for a Sport Fishing Board as advocates for the Sport Fisherman. Lynn made the motion to create a Sport Fishing Board as advocates for the Sport Fisherman. 2nd by Rich Jones. All in Favor. None Opposed. Motion Carried.

December 3rd for Elections

Meetings for 2023-

Feb 18, April 1, Sep 9, Dec 2

Lynn made a motion to approve the dates for 2023. Mark made the 2nd. All in Favor. None Opposed Motion Carried.

Things to work on Membership Increase

Fundraiser

This item was noted at the beginning of the meeting. I have moved it here for flow of the minutes.

Treasurers Report- Lynn Stated \$707 in the Checking Account

\$5047 in the Savings Account

There was no more Organization business to be discussed. A motion was made by Lynn to adjourn at 11:28 am. 2nd by Mark. All in Favor. None Opposed. Motion Carried.

Salmon Unlimited Wisconsin Weather Buoy 45199

You can find buoy data reported from the Weather conditions page at

<https://salmonunlimitedwisconsin.com/lake-conditions>

Please make note of approximate buoy location. The buoy does have a marker light that is active in low light conditions.

Pink salmon

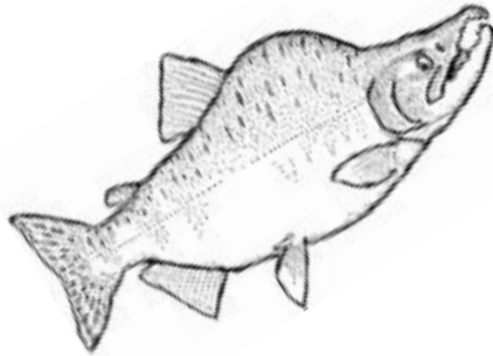

Oncorhynchus gorbuscha

Pink salmon, also called "humpies," are the smallest of the Pacific salmon. They are usually found in streams and rivers that connect directly to salt water (with no lakes in between). But, pink salmon sometimes "stray" and can be seen spawning in creeks that you wouldn't expect! If you see a salmon, here's some tips to use to determine whether or not it's a pink salmon...

Photos from Inland Fishes of Washington by Whitney and Wydoski, © 1979 University of Washington Press. Reprinted by permission of the University of Washington Press.

Adult Male Pink Salmon.

Adult Female Pink Salmon.

Identification characteristics:

- Rare in Lake Washington Watershed
- Oval-shaped black spots on back and caudal fin
- Males have very large humpback
- Tail is very forked

Range in length from 14 to 30 inches

Spawn timing:

- August through October only in ODD-numbered years in our area

Coho salmon

Oncorhynchus kisutch

Coho salmon, also called "silvers" or "silver salmon," are another species of Pacific Salmon found in King County. Coho often spawn in the smaller streams and don't tend to spawn in the larger rivers like [Chinook](#). Because spawning coho can be red in color, similar in size, and spawn or travel through the same streams, they can sometimes be confused with [sockeye](#). If you see a salmon, here's some tips to use to determine whether or not it's a coho...

Photos from Inland Fishes of Washington by Whitney and Wydoski, © 1979 University of Washington Press. Reprinted by permission of the University of Washington Press.

ADULT MALE COHO

ADULT FEMALE COHO

Identification characteristics:

- Back and head dark bluish-green
 - Lower sides brilliant red to wine color
 - Gill cover reddish
 - Spots on back and UPPER lobe of tail fin only
 - Lower gum line is light colored
- Range in length from 17 to 38 inches

Spawn timing:

- Mid-October through early January

Chinook

Jaw – dark mouth and black gums at the base of its large, sharp teeth. Immature Chinook are known as a "blackmouth."

Tail – both the upper and lower lobes of the tail are covered with spots and silver is prominent.

Coho

Jaw – Jaw- mouth is white and the gum line is almost white, but the tongue may be black. The medium-sized teeth are sharp.

Tail – has just a few scattered spots, usually on the upper lobe, with silver streaks. Base of tail is wide.

Pink

Jaw – mouth of a pink is white, but the gums and tongue are black, as they are in a Chinook. It does not have "teeth" on its tongue.

Tail – is covered with large oval spots. It does not have silver on the tail. The scales are very small compared to other salmon.

Chinook

Jaw – The chinook has a dark mouth and black gums at the base of its teeth. Immature chinook are known as a "blackmouth"

Tail – Both the upper and lower lobes of the tail are covered with spots and silver is prominent.

Coho

Jaw – The mouth is white and the gum line is almost white, but the tongue may be black. The teeth are sharp and strong.

Tail – The coho tail has just a few scattered spots, usually on the upper lobe, with silver streaks. It has a wide caudal peduncle.

Pink

Jaw – The mouth of a pink is white, but the gums and tongue are black, as they are in a chinook. It does not have "teeth" on its tongue.

Tail – The pink salmon tail is covered with large oval spots. It does not have silver on the tail. The scales are very small compared to other salmon of the same size.

Chum

Jaw – The mouth is white and the gum line is white, but the tongue may be black. The lips are fleshy with well developed teeth in both jaws, but there are no teeth on the base of the tongue.

Tail – The tail has no spots, but does have silver streaks covering about half of the fin. The caudal peduncle is narrow.

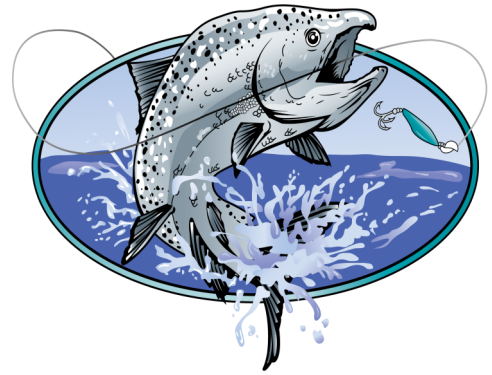

Sockeye

Jaw – The mouth is white and the gum line is white. The lips are fleshy. The teeth are small and well developed in both jaws. There are no teeth on the base of the tongue.

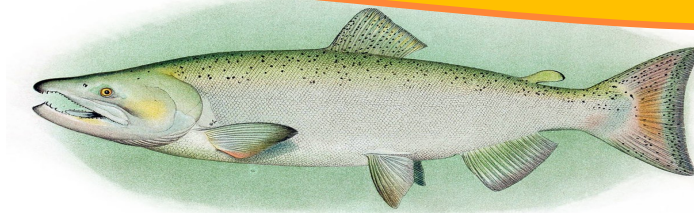

Tail – There are no spots on the tail.

"WINDPOINT KING"
by Scott Zoellick

Salmon Unlimited Sponsor Print

Salmon Unlimited Wisconsin, Inc. is a non-profit organization dedicated to the enhancement of the sport fishery, thru improving water quality, fish stocking, and lake shore improvements. Much of this is accomplished by membership projects and Natural Resource Scholarships.

About the Artist: Scott Zoellick's artwork is well known to outdoor enthusiasts around the country. His achievements are many and include winning the 1981 Trilene Outdoor Illustration competition, the 1983 Wisconsin Trout Stamp design, 1987 Wisconsin Great Lakes Stamp design, 1987 Wisconsin Inland Trout Stamp design, and three recent "Best of Show" awards. He has shown his work at the prestigious Leigh Yawkey Woodson "Birds of Art" exhibition.

Zoellick was recently selected as one of 1987's "Most Interesting People in Town" by Milwaukee Magazine. He was also selected as the "1987 Artist of the Year" for the Wildlife and Western Art exhibition in Minneapolis, Minnesota, where the National Wildlife Art Collectors Society inducted him into their "Hall of Fame". Scott Zoellick's work is fast becoming one of the most sought after in the field of wildlife art.

About the Print:

495 S/N Image Size: 25"x14 3/4"

The print is available with a sponsoring membership in Salmon Unlimited Wisconsin, Inc. by sending your check for \$110.00 (tax included) to:

The above link is to the most recent Newsletter November 2021

GREAT LAKES

No Salt
No Sharks
No Earthquakes
No Volcanoes
No Hurricanes
No Worries

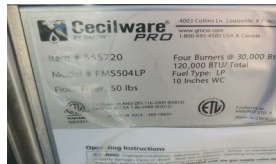

However, we do have mosquitoes
that will carry off your young.

Cecilware Pro Deep Fryer
120,000 BTU asking \$750

Patriot 90,000 BTU
DEEP FRYER \$300.00

These items are sold as is. If interested please

contact either
